# INTRODUCTION

Education is something that is very important for a nation and will determine how it develops in the future. Many countries in the world consider education as a top priority.

In 2021, Indonesia will be ranked

55th

out of a total of 75 countries in the Asian Region for the Asian Education System Ranking. Based on the 2021 Legatum Prosperity Index™, Indonesia ranks 88th out of 167 countries in the world which has an increase of 4 ranks over 10 years and is ranked 20th out of 29 countries in Asia-Pacific.

The current state of education in Indonesia cannot be said to be very good, but this does not rule out the possibility that it can be developed for the better in the future. The problem of the pandemic and the existence of social inequality are some of the causes of the uneven quality of education in Indonesia. The big challenge now is to improve the quality of education and increase equity in providing that quality within the country, especially between rural and urban communities

Currently countries such as the UK, Finland and Singapore are known to have the best education systems. These countries have systems that empower students' interests and abilities, emphasis on practical work over theory and strict selection of qualified teachers. In order to be one of the countries with good quality Education, we want to create an effective Education environment by using blockchain as a tool. Over time, if this can work well, it can not only be used in Indonesia but can also be treated throughout the world by means of collaboration from various parties.

Economic factors and the uneven distribution of infrastructure throughout Indonesia are some of the problems that become the main problem in the development of the education factor in Indonesia. In order to solve these problems, AMI tokens are here to develop education to remote areas of Indonesia by using blockchain technology.

OUR BACKGROUND

We have concluded that online education is a solution regarding the cost of education and also the distrbution of quality education in Indonesia

The Covid-19 pandemic has disrupted the education sector, trial & error online learning and education costs that have not decreased even in the midst of a pandemic have made us want to find solutions to provide online education with the best facilities at affordable prices. After considering the various opportunities and risks, we have concluded that online education is a solution regarding the cost of education and also the distribution of quality education in Indonesia. That's the origin of why we started this Future School project.

We hope that with this platform or project we can provide online learning for all regions in Indonesia, both capable and underprivileged, so that in the future there will be no such thing as gaps in the world of education. With the best online learning facilities, we are also moved to improve the quality of human resources in Indonesia starting with the nation's children, we believe that Indonesian children have extraordinary potential, it's just that some are less fortunate from the financial factor and they do not get educational facilities because of that problem, we provide the best and easy-to-reach online educational facilities to remote areas at affordable costs and scholarship programs for those who want to study with **Future School Tokens.**

FS TOKEN
future school token

To achieve the goals we dream of, we need the support of various parties. Therefore, we created **Future School TOKEN** as a means of crowdfunding and can also function as a partial scholarship or full scholarship for each student, and can be a collaboration facility for other schools in Indonesia, and for the wider community, **Future School TOKEN** can help make our program a success. advancing education and Indonesian human resources plus getting the benefits of investment value as this program progresses, this program belongs to all of

OUR PROJECT

Future School is a platform that aims to create new innovations in the world of education where children can take an education that is appropriate for their age without having to think about costs and they can pursue their dreams. Future School, which collaborated with AMI to form AMI Future School, initiated the actualization of our vision, which is to create the next generation of leaders through education by utilizing technological advances and our mission to create an effective and fun learning environment by utilizing technology. To support children in getting the best educational services, we need to create a method to help fund ongoing educational activities. Therefore, **Future School Token** is here as a solution to this problem. Through **Future School Tokens**, people can help finance education by buying tokens or transacting using **Future School Tokens**.

Future School TOKEN

Future School token is a cryptocurrency used for the future school education platform. This token uses the Binance blockchain (BEP20) as a means to make transactions. We chose BEP20 for several reasons, namely:

1.
BEP20 includes common functions that can be defined for tokens such as showing the total token supply, displaying the token balance of an address on the network, defining how tokens are sent to an address defining how tokens are sent from an address, and so on

- Token name
- Token symbol
- Number of decimals for token units
- Address of token owner

2.
BEP20-based transactions involve significantly lower fees, in large part thanks to the BSC proof of staked authority (PoSA) block validation method. Under the PoSA model, the validating node stakes a certain amount of BNB coins to verify the transaction. The top 21 nodes with the highest amount of BNB staked receive validation rights. The average transaction using the BEP20 token will likely cost you no more than a few cents.

3.
The PoSA method also provides fast transaction execution speed in verifying individual transactions varies. The average block verification time on the BEP20 is about 3 seconds.

FUTURE

FS Token Total Issued	100.000.000.000
FS Token Issued Pre-Sale	10.000.000.000
Pre-Sale Price per FS Token	IDR 1,00
Minimum Purchase per Participant	IDR 5.000.000,00
Maximum Purchase per Participant	IDR 1.000.000.000,00
Market Value of FS Token	IDR 1.000.000.000.000.000
Pre-Sale Open (1st Wave)	1st July 2022
Pre-Sale Close (1st Wave)	31st July 2022
FS Token Issued 2nd Wave	20.000.000.000
Sale Price per FS Token	IDR 10,00
Sale Open (2nd Wave)	1st August 2022
Sale Close (2nd Wave)	30th August 2022
FS Token Issued 3rd Wave	30.000.000.000
Sale Price per FS Token	IDR 100,00
Sale Open (3rd Wave)	1st September 2022
Sale Close (3rd Wave)	31st September 2022
FS Token Issued ICO	40.000.000.000
FS Token ICO Date	1st October 2022
FS Token ICO Price	IDR 1.000,00

Future School Token

FUTURE SCHOOL TOKEN & FUTURE SCHOOL

Roadmap

July 2022

Future School Token

Pre-sale Future School Token Until 30st July 2022
Price : IDR 1,-
Token Available for Pre-Sale : 10.000.000.000 Token

Future School

Soft-Launching Future School
Basic Learning (Text/Pdf, Video)
1 on 1 online tutor
Workshop

August 2022

Future School Token

2nd Sale Future School Token Until 31th August 2022
Price : IDR 10,-
Token Available for 2nd Sale : 20.000.000.000 Token

Future School

Beta-Test Program (untuk orang mengikuti program pre-sale AMI Token akan mendapatkan Akun untuk mencoba program Future School sebelum Grand Launching Future School).

September 2022

Future School Token

3rd Sale Future School Token Until 30st September 2022
Price : IDR 100,-
Token Available for 3rd Sale : 30.000.000.000 Token

Future School

Enhance Main Program.
Future School Open Public

FUTURE SCHOOL TOKEN & FUTURE SCHOOL

Roadmap

October 2022

Future School Token

ICO AMI Token
Price : IDR 1000,-
Token Available for ICO : 40.000.000.000 Token
